EDUCATION

University of California, Berkeley

Berkeley, CA

Bachelor of Arts in Computer Science

Exp Grad: May 2026

Relevant Coursework: Structure and Interpretation of Computer Programs, Foundations of Data Science, Data Structures and Algorithms, Linear Algebra, Discrete Mathematics and Probability, Efficient Algorithms and Intractable Problems

EXPERIENCE

Software Engineer Intern

May 2024 – Aug 2024

Redapt Inc

Woodinville, WA

- Improved marketing team's data storage by over 55% by developing marketing analyst tool
- Managed Docker containers and worked with release team to make deployments
- Enabled the marketing team to produce 25% more content per month by providing instant access to accurate company information through a RAG tool

Undergraduate Academic Intern

Jan 2024 – May 2024

University of California, Berkeley EECS Department

Berkeley, CA

- Assisted with teaching and mentoring students in CS61B, an advanced data structures and algorithms course
- Facilitated weekly lab sessions with 25+ students, providing guidance to students in solving programming problems
- Designed course materials, including 10+ programming assignments, 50+ practice problems, and 3 exams

Undergraduate Researcher

Jan 2024 – May 2024

Berkeley Laboratory for Usable and Experimental Security (BLUES)

Berkeley, CA

- Achieved a 61% improvement in efficiency for security protocol implementation and testing within the lab by developing a Java mobile application and corresponding SDK
- Analyzed data of over 50 participants in a research study using MATLAB and Python
- Participated in the literary review and contributed to a research paper on computer security protocols

PROJECTS

Marketing Analyst Tool | *Beautiful Soup, React, Pytorch*

- Utilized Beautiful Soup and Google Search API to scrape and aggregate relevant marketing data
- Developed a extractive text summarization model using PyTorch's HuggingFace Transformers library to analyze and summarize the scraped data
- Built an interactive frontend using React, allowing marketing analysts to easily input parameters and view results.

Company Information RAG Tool | *Azure ML Studio, Azure AI Search, Azure OpenAI API Service*

- Created a retrieval-augmented generation (RAG) model using Azure ML Studio's Prompt Flow and Azure AI Search with company data
- Automated the Prompt Flow process by developing code with Azure OpenAI's API
- Deployed as an endpoint for streamlined and scalable access

Reddit Comment Bot | *Python Reddit API Wrapper, Python*

- Developed a Reddit bot using Python and PRAW (Python Reddit API Wrapper) library to automate responses based on specific phrases/triggers
- Automated Reddit interactions, achieving a maximum of 200 comment replies daily

TECHNICAL SKILLS

Languages: Python, Java, Javascript, SQL

Frameworks/Libraries: React, Pytorch, Beautiful Soup, Pandas, Flask

Others: GIT, AWS, Linux, Docker, Kubernetes, CSS, HTML

EXTRACURRICULARS

Volunteer and Event Coordinator

Aug 2022 - Present

Berkeley Habitat for Humanity

Berkeley, CA

- Plan and execute fundraising events specifically aimed at supporting Habitat for Humanity construction projects, such as charity auctions, benefit concerts, or crowdfunding campaigns.
